**Waste Management**

(866) 699-6466

### Carpet Recycling

### Phone

**Flooring Transport of America**  
1601 Perry Dr. SW, Canton

(330) 639-1982

### Fluorescent Light Bulbs

### Phone

**Waste Management**

(866) 699-6466

### AEP Ohio Appliance Recycling Program

- 1) Turn in your old appliance through the Appliance Recycling program and receive a \$50 incentive check plus **free**, convenient pick up of your old, working refrigerator or freezer.
- 2) You must be a current AEP Ohio Customer residing in Ohio.
- 3) Call **1-877-545-4112** to schedule a pickup and learn the requirements of the appliance recycling program.

### Household Chemicals

Unfortunately there are no drop off points for household chemicals, but there are options for disposal of them.

- 1) Use up your household chemicals (even if it's a little old, it should still work).
- 2) Give unused materials to a friend, neighbor, relative or local shelter.
- 3) If you cannot use up or donate the materials, solidify the materials using cat litter and contact your trash company to see if they will accept the solidified items.

### Latex Paint

The best way to avoid excess paint is to calculate how much is needed before you start your project.

**Buy latex paint.** It is easily applied and can be cleaned with soap and water.

**Use it up.** If you can't use the excess paint, give it to friends, relatives, theatrical groups, recreation departments and community service organizations. Give away only paint that is good quality in its original container with the label intact.

**Save paint for future use.** It will last for years if sealed tightly and stored where it will not freeze.

**If paint is dry, it can be disposed of in your regular trash.** The lid must be removed so that the hauler can see it is dry.

**If the paint is wet follow these directions:**

**For quantities greater than 1 inch left in the container.**

- 1) Find a well-ventilated area that is protected from children and pets.
- 2) Add cat litter or sawdust to absorb the paint.
- 3) Every couple of days, stir the mixture to allow air to flow through. Depending on the type and quantity of paint you have, the drying process can be lengthy and may take from several days to several weeks.
- 4) When completely dry, discard w/ regular trash (put in box or bag) leaving the lids off so the trash company can see that it is hardened.

**For small quantities less than 1 inch left in the container.**

- 1) Find a well-ventilated area that is protected from children and pets.
- 2) Remove the lid and allow the liquids to evaporate (make sure there is proper ventilation). Do not smoke near cans and avoid contact with the liquid or inhaling vapors.
- 3) When completely dry, discard with regular trash (put in box or bag) leaving the lids off so the trash company can see that it is hardened.

**NOTE:** Small quantities of paint and aerosol sprays can be painted on cardboard or newspaper to use up. You can then dispose of the cardboard or newspaper in your regular trash.

**Find information on how to recycle other items and links for Stark, Wayne & Tusc. County recycling info at [www.timetorecycle.org/whattodo.php](http://www.timetorecycle.org/whattodo.php)**
