January-March 2014

SCRPC Services, Inc. dba The Stock Pile 201 3rd Street NE, Canton

## 4 Easy Ways to Winterize Your Home

### 1. No More Drafts

According to the U.S. Department of Energy, drafts can waste 5% to 30% of your energy use. Start simple and adopt that old Great Depression fixture -- the draft snake! Just place a rolled bath towel under a drafty door, or make a more creative DIY snake!

### 2. Run Fans in Reverse

Did you know that fans run in reverse make a room warmer? Many ceiling units come with a handy switch that reverses the direction of the blades. Clockwise fan rotation makes a room warmer: air

pooled near the ceiling is circulated back into the living space - cutting your heating costs as much as 10%!

### 3. Caulk the Cracks

Simple leaks can sap home energy efficiency by 5% to 30% a year, according to the U.S. Department of Energy. That means it pays to seal up gaps with caulking and weather-stripping.

Use the incense test: move a lit stick along walls; where the smoke wavers, you have air sneaking in or out.

### 4. Change the Filter

Check your filter every month, especially during heavy use months (winter and summer). If the filter looks dirty after a month, change it. At a minimum, change the filter every 3 months. A dirty filter will slow down air flow and make the system work a little harder to keep you warm or cool.
